Essential GCSE Maths 41.8

Essential GCSE Maths 41.8

Find the following angles of elevation and depression.

In this exercise give your answers to 3 s.f. when rounding is required.

Home Maths Essential GCSE Maths 41.9

Essential GCSE Maths 41.9

The diagram shows a ship near the coast. The ship is at point A, $200\,\mathrm{m}$ from a buoy at B. On the cliff top there is a lighthouse. The tip of the lighthouse (point C) is $y\,\mathrm{m}$ above the level of the sea at D.

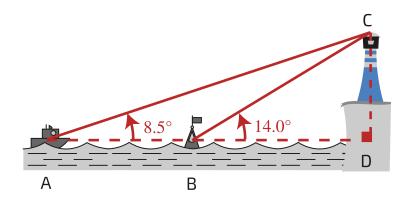

Figure 1: A diagram of the lighthouse, the ship and the buoy.

The angle of elevation of the top of the lighthouse is 8.5° at A and 14.0° at B.

What is the value of y?

Maths

Sine and Cosine Rules and Area 1i

Sine and Cosine Rules and Area 1i

Figure 1: Positions of two points on a coastline, and a nearby ship.

Figure 1 shows two points A and B on a straight coastline, with A being $2.4 \, \mathrm{km}$ due north of B. A stationary ship is at a point C, on a bearing of $040 \, ^{\circ}$ and at a distance of $2 \, \mathrm{km}$ from B.

Part A Find AC

Find the distance AC in kilometres, giving your answer correct to three significant figures.

Part B Find θ

The bearing of C from A is θ °. Find the value of θ correct to three significant figures.

Part C Shortest distance

Find the shortest distance from the ship to the coastline, giving your answer in kilometres correct to three significant figures.

Maths

Trigonometry: Basic Functions 1ii

Trigonometry: Basic Functions 1ii

Part A
$$\sin(\frac{1}{2}x) = 0.8$$

Solve
$$\sin(\frac{1}{2}x) \,=\, 0.8$$
, for $0^\circ \,\leqslant\, x \,\leqslant\, 360^\circ.$

What is the lowest (smallest) solution? Give your answer in degrees, to 3 significant figures.

What is the highest (largest) solution? Give your answer in degrees, to 3 significant figures.

Part B
$$\sin(x) = 3\cos(x)$$

Solve
$$\sin(x) = 3\cos(x)$$
, for $0^{\circ} \leqslant x \leqslant 360^{\circ}$.

What is the lowest (smallest) solution? Give your answer in degrees, to 3 significant figures.

What is the highest (largest) solution? Give your answer in degrees, to 3 significant figures.

Essential GCSE Maths 50.7

A garden designer is planning to build a semi-circular patio on one side of a triangular lawn.

The plans are shown in the diagram.

In this exercise give your answers to 3 s.f..

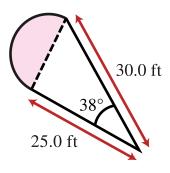

Figure 1: A plan of the garden with a triangular lawn and a semi-circular patio.

Part A What will the area of the lawn be?

What will the area of the lawn be?

Part B What will the area of the patio be?

What will the area of the patio be?

Maths

Trigonometry: Basic Functions 2ii

Trigonometry: Basic Functions 2ii

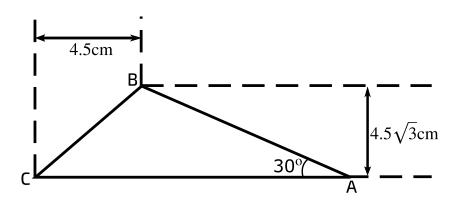

Figure 1: Triangle ABC

Part A

For triangle ABC calculate the exact length of AB in cm.

Part B

For triangle ABC calculate the exact length of AC.

Part C

Given that α is the acute angle such that $\tan(\alpha)=\frac{2}{3}$, find the exact value of $\sin(\alpha)$, giving your answer in the form $\frac{a\sqrt{b}}{c}$, where a,b and c are integers.

Home Maths Sine and Cosine Rules and Area 2i

Sine and Cosine Rules and Area 2i

Figure 1 shows ABCD, a quadrilateral in which AD is parallel to BC. It is given that the distance AB = 9, BC = 6, CA = 5 and CD = 15.

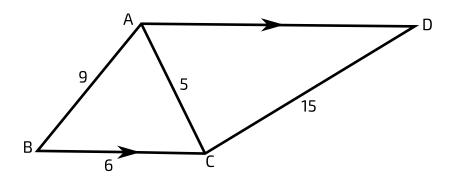

Figure 1: A quadrilateral in which AD is parallel to BC.

Part A Find sin

Show that $\cos(BCA) = -\frac{1}{3}$, and hence find the value of $\sin(BCA)$, giving your answer to 3 significant figures.

Part B Find angle

Find the angle ADC, giving your answer in degrees to 3 significant figures.

Sine and Cosine Rules and Area 3i

Sine and Cosine Rules and Area 3i

A landmark L is observed by a surveyor from three points A, B and C on a straight horizontal road, where $AB=BC=200\,\mathrm{m}$. Angles LAB and LBA are $65\,^\circ$ and $80\,^\circ$ respectively (see **Figure 1**).

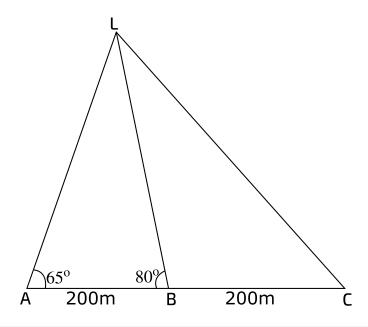

Figure 1: A triangle where AB=BC and B connects to L

Part A Shortest distance

Calculate the shortest distance from L to the road. Give your answer in metres, to the nearest metre.

Part B Distance LC

Calculate the distance LC. Give your answer in metres, to the nearest metre.

Home Maths Essential GCSE Maths 50.9

Essential GCSE Maths 50.9

A landowner has a triangular piece of land. They are planning to build a path along the boundary of the land, and plant trees in the centre. Each tree will need $50\,\mathrm{m}^2$ of land when it is mature. The landowner knows that some trees will not survive to maturity. They plant 30% more trees than the maximum suggested by an area calculation.

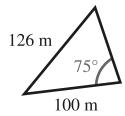

Figure 1: A plan of the piece of land that trees are going to be planted on.

Part A How long is the path?

How long is the path? Give your answers to 3 s.f..

Part B How many trees will be planted

Assuming that the landowner plants as many trees as possible, how many trees will be planted? Round up to the nearest whole tree.

Maths

Trigonometry: Basic Functions 3i

Trigonometry: Basic Functions 3i

Part A sin and cos graphs

On the same set of axes sketch the graphs of $y=\sin x$ and $y=\cos x$ for values of x such that $0^\circ \le x \le 360^\circ$.

Easier question?

Part B Trigonometric values

Work out from first principles the exact values of $\sin 60^{\circ}$ and $\cos 120^{\circ}$. Let these values be s_1 and c_1 .

Give the exact value of $\sin 60^{\circ}$.

Give the exact value of $\cos 120^{\circ}$.

Part C sin and cos graphs 2

Add to your sketch two lines of the form y=k to illustrate the graphical method for solving equations $\sin x = s_1$ and $\cos x = c_1$.

Easier question?

Part D Solve angles

Give any of the solutions to the equation $\sin x = s_1$ for values of x such that $0^\circ \le x \le 720^\circ$. Give your answer in degrees.

Give any of the solutions to the equation $\cos x = c_1$ for values of x such that $0^\circ \le x \le 720^\circ$.

Part E Smallest x value

What is the smallest positive value of x for which $\sin x = \cos x$? Give your answer in degrees.

Part F Number of solutions

How many solutions exist for the equation $\sin x = \cos x$ for values of x such that $-360^\circ \le x \le 360^\circ$?
